```
Given def randomPhoneNumber =
  """
  function() {
    var phoneNumber = '555-' + Math.floor(Math.random() * 1000);
    return phoneNumber;
  }
  """
And def phone = randomPhoneNumber()
```

1. **Creating Arrays with a Range:**

```gherkin
Given def numbers = Array.from({ length: 5 }, (_, index) => index + 1)
```

1. **Simulating Network Delay:**

```gherkin
Given def delayInSeconds = 3
And configure retry = { count: 3, interval: delayInSeconds * 1000 }
```

1. **Handling Dates and Timezones:**

```gherkin
Given def currentDate = new Date()
And def utcTime = currentDate.toISOString()
```

1. **Validating Multiple Fields in a Response:**
